Navy Releases New Plan to Retest Part of Hunters Point

www.nbcbayarea.com

The Navy just released its plan to retest the Hunters Point Shipyard for radiation. The Navy found its cleanup contractor, Tetra Tech, manipulated radiation data. The Navy has to redo the work, and on Wednesday...

October 3, 2018

Navy to conduct comprehensive surface scan on Parcel G, previously transferred parcels.

Statement: The Navy is committed to ensuring the City of San Francisco and the community have confidence in the safety of land transferred from Hunters Point to the City of San Francisco. In addition to re-evaluating areas where Tetra Tech EC did radiological work as part of the current draft Parcel G Work Plan, the Navy will also be completing a health and safety scan of all accessible areas of Parcel G after the re-testing work is complete and prior to transfer to the City of San Francisco. Similarly, Navy will perform health and safety scans of the surface of Parcels D-2, UC-1, and UC-2

after the reevaluation of Tetra Tech EC's work on those parcels is complete to provide confidence in their suitability for reuse by the City.
